

ONION TANK™

SELF-SUPPORTING OPEN TOP WATER TANK

Militaries and industry rely on the Onion Tank for the storage of drinking water in remote locations and emergency situations. With capacities ranging from 264 USG to 3000 USG, this open-top tank is approved for potable water and is constructed of heavy duty urethane coated fabric. Complete with a top cover (to prevent evaporation and contamination), the Onion Tank is fully collapsible and easily transportable.

DESIGN FEATURES

- No assembly required; the self-supporting design allows for quick set-up and knock-down.
- Completely collapsible; the Onion Tank can be easily folded, taking up minimal storage space.
- Deployment anywhere; the low profile of the Onion Tank provides stability on slopes up to 12.5 degrees allowing deployment with minimal site preparation.

PRODUCT FEATURES

- The unique flotation collar requires no inflation and is also capable of supporting a hose when top filling.
- The fitted top cover is firmly held in place by shock cord straps or a zipper to minimize contamination while still providing quick installation and easy access for inspection.
- Handles on the outside of the tank allow for quick set-up and easy lifting.
- A handle on the inside of the tank allows it to be opened inside out for easy cleaning.
- Two 2" fill/drain ports, 180° apart, provide the capability to discharge liquid quickly from either side of the tank.
- Flange and abrasion covers provide solid protection for the drain ports.

FABRIC OPTIONS

- **Aqua-Shield**
 - 24 oz. Mil-Spec (PD-53048)
 - 30 oz. NSF (approved for potable water storage)
 - 32 oz. Mil-Spec (Mil-T-53029C)
- **Chem-Shield**
 - 30 oz. Chemical-resistant fabric for grey or black water storage

ONION TANK ENCLOSURE OPTIONS

ONION TANK STANDARD

The standard model has a lid with shock cords that attach to the handles on the tank.

ONION TANK ZIPPERTOP

This model has a zipper that secures the lid and prevents dirt and debris from entering the tank.

ONION TANK ZIPPERTITE

The water-tight ZipperTITE enclosure option makes the Onion Tank a completely sealed tank ideal for the storage of potable water.
