

# COBRA<sup>®</sup> & Bambi Bucket<sup>®</sup>

## The Ultimate Initial Attack Solution

The Cobra Helicopter has a new best friend – the custom-designed Bambi Bucket model BB320C. The Cobra/Bambi Bucket combo is a complete “fly away” system that provides fast initial attack, accurate water drops, and maximum volume capacity.

### Initial Attack Bambi Bucket — BB320C

Lightweight and tough, the Cobra Bambi Bucket offers all of the features and benefits of the original Bambi Bucket design. The Cobra Bambi Bucket is small enough to fit inside the cargo compartment without sacrificing bucket capacity. With the ability to deliver 324 USG (1225 liters) of fire suppressant, the Cobra Bambi Bucket is the ultimate tool in initial attack.

The BB320C Bambi Bucket is stable in flight and very responsive to pilot control, making it the most accurate helicopter firefighting tool on market.

The Cobra/Bambi Bucket system allows access to most water sources, unavailable to tanked helicopters, significantly reducing turnaround time and maximizing volume/hour performance.

The fly-away Cobra/Bambi Bucket combo is the ultimate initial attack system – **FAST** and **EFFICIENT!**

### Extended Attack Buckets & Options

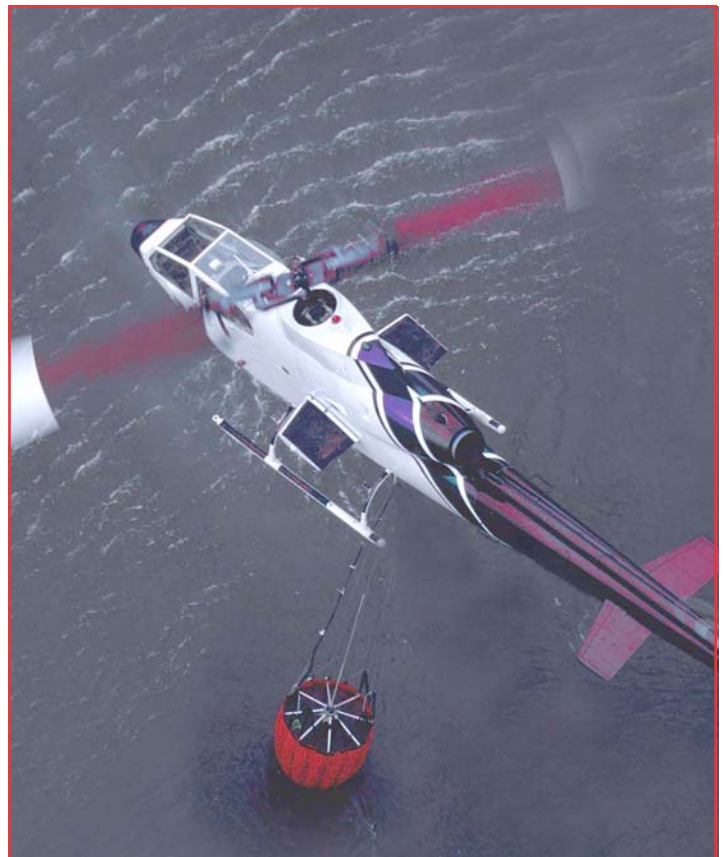

#### TORRENTULA VALVE<sup>™</sup> Bambi Bucket & **PowerFill I**<sup>™</sup>

For extended attack operations, the Torrentula Valve Bambi Bucket provides Cobra pilots with ultimate control. Multiple drop and quick open/close actuation of the Torrentula Valve allows for increased productivity and enhanced operational flexibility.

The PowerFill I option adds even greater versatility to the firefighting capabilities of the Cobra. Operators can fill from water sources as shallow as 18 inches (46 cm), which translates into more water drops per hour and less fuel spent searching for deep water filling sites.

#### Sacksafoam

The Sacksafoam I Foam Injection System can be installed directly onto the Bambi Bucket, while the operator controls the foam dispenser via the Control Unit. The built-in foam dispense timer and drop counter mean that Cobras can now get the most out of every gallon of water.

## Bambi Bucket Accessories

The Bambi Bucket Family provides a wide selection of accessories to aid and guarantee that the Bambi equipped Cobra can respond quickly and efficiently to an array of emergency situations.

- Marine Recovery Device
- Remote Power Supply with Charging Unit
- Stainless Steel Suspension Liners
- Emergency Water Release
- Pilot Control Wire Harness Extension
- Level Indicator
- Mobile Utility Cart
- Fire Hose Hydrant Connector
- Spare Kit for PowerFill I
