BBK011—TRIP BLOCK LINKAGE ASSEMBLY

Product: Bambi Bucket
Applicability: Standard valve Bambi Bucket models BB6072 to BB4453
Components: Trip Block Linkage Assembly Kit for Control Head internal replacement.
Overview: Replacement part. Used internally within the Control Head of the Bambi Bucket. Provides the mechanical actions required to transfer movement from actuation of the solenoid to release of water from the valve in the Bambi Bucket. The Trip Block Linkage Assembly Kit is for replacement of worn, aged components to ensure reliable operability of the control head and valve.
