

Drip Defender

The Drip Defender is a rugged, easy-to-use, all-purpose spill collection pad designed to catch fuel or chemical leaks. It is ideal for use under all types of vehicles, industrial machinery, or any other potential sources for leaks. The Drip Defender can withstand all climates and conditions.

The standard Drip Defender is chain-supported; the weighted edge allows for outdoor use and enables excess liquid containment after the sorbent pad is saturated.

Features

- Includes a window-style pocket designed to hold a standard 19" x 17" (48 cm x 43cm) sorbent pad;
- A grommet in one corner comes with an optional string attached that allows for easy retrieval from under vehicles; and
- Drip Defender can be folded or rolled up for hassle-free storage.

Berm Options

- Available with chain or foam supported walls (or unsupported);
- Custom window sizes are available for various sizes of sorbent pads;
- Multiple window configurations are available to extend the protection area; and
- Windowless versions are also available.

Fabric Options

Chem-Shield – rugged and abrasion resistant, the Chem-Shield™ fabric is suitable for a variety of chemicals and is cold-crack resistant to -34°C.

Arctic-Shield – Certified to CAN/ULC-S668-12, Arctic-Shield™ Lightweight and Heavyweight fabric features chemical and fire resistance properties and is cold-crack resistant to -50°C (not suitable for acids). In addition to superior abrasion resistance, Arctic-Shield Heavyweight remains flexible in freezing temperatures, making it ideal for set up in the winter.
