

The FlexPak is a collapsible backpack tank with a hand-pump for fire control and mop-up operations by ground personnel. This ambulatory tank is currently in use in 82 countries worldwide. If required, the pump can be equipped with a reservoir for foam-concentrate application.

Backpack Features

- The heavy-duty industrial fabric is ultraviolet-resistant, and features lap-welded seams and quick release sternum straps;
- At capacity, the FlexPak holds 5 USG (19 liters);
- Designed with back comfort in mind, the maximum weight of an empty FlexPak is roughly 4.5 lbs (2 kg) and when full weighs roughly 46.4 lbs (21 kg);
- It comes fitted with smooth, comfortable, padded shoulder harnesses;
- It is compact and collapsible, making it easy to store; and
- Fittings ensure outstanding performance: 4" (101 mm) filler cap (positive seal), built-in debris screen in fill valve, quick connect couplings to backpack.

Pump Features

- Rust proof;
- Designed for easy field maintenance;
- Can be operated with left or right hand;
- Garden hose threads;
- Brass cylinder with high-impact composite cover; and
- Field repairable.

Add-Ons and Accessories

- Foam pump with air-aspirated nozzle and concentrate reservoir holds 16 fl. oz. (500 ml)
- Repair kits available for backpacks and pumps
- Custom fittings available on request
- Adjustable nozzle for pencil stream or fog mist spray
