

SACKSAFOAM™ CONTROLLER

SEI is introducing a new Sacksafoam Controller (SFC). This SFC will supersede the original controller for customers with bladder style Sacksafoam I systems. Currently, the new SFC is not directly compatible with Sacksafoam II or Sacksafoam III systems. SEI will continue to provide the original controller to service Sacksafoam II's and Sacksafoam III's while stock exists.

The SFC is operated with a glove compatible touch screen. The SFC includes an adapter that connects to the existing Sacksafoam wiring harness and includes a D-sub connector that can be used to connect with a remote injection switch.

DZUS rail adapters are available for the SFC. Please note that the product dimensions have changed and the new SFC will not fit in the same location on a DZUS rail system as the original Sacksafoam controller.

| | STANDARD | METRIC |
|------------------------------|--|--------------------|
| SIZE | 3.39" x 4.57" x 2.24" | 86 x 116 x 57 (mm) |
| WEIGHT | 1.08 lbs | 490 g |
| OPERATING VOLTAGE | 24V – 28V DC | |
| QUIESCENT CURRENT | 60mA @ 28V | |
| MAX CURRENT | 10.1A @ 28V | |
| DISPLAY | 4.3" (diagonal) TFT, LCD, 480 x 272, anti-glare | |
| TOUCH SCREEN | Resistive, suitable for operation with gloved hand | |
| EXTERNAL HAND CONTROL | Switch, Momentary, SPST | |
