

SEI COMBAT SUPPORT

SERVING THE CANADIAN FORCES AND MORE THAN 50 OTHER MILITARY FORCES AROUND THE WORLD

SEI Industries Ltd. has a long and proud tradition of providing the Canadian Forces (CF) with fuel and water combat support systems to sustain North Atlantic Treaty Organization (NATO) and United Nations (UN) peacekeeping operations. Since the early 1990s, SEI has been the Canadian Forces primary supplier of products that transfer, transport, meter, filter and store fuels, water and chemicals. These products offer mobile liquid handling solutions that are Canadian-engineered and manufactured.

CF MISSIONS IN CANADA

Operation GRIZZLY – SEI provided secondary containment berms for fuel supplies that keep equipment and resources working throughout the G8 Summit in Kananaskis, Alberta.

Operation MAPLE LEAF – Canadian Forces hosted annual NATO air forces for joint exercises, using SEI's FSDS and HPARS fuel systems, in Cold Lake, Alberta.

Operation NARWHAL – This operation consisted of two simulated scenarios (a threat to oil production and a major airline disaster in the far North). SEI supplied fuel bladders and FARE (forward area refueling equipment) for this operation.

Operation PODIUM – Canadian Forces delivered safety and security operations throughout the Vancouver 2010 Olympics. SEI's HPARS was used to refuel Griffin helicopters that would negate terrorist threats.

DART is a military organization designed to deploy rapidly anywhere in the world for incidents ranging from natural disasters to complex humanitarian emergencies. SEI supports the DART teams with its Onion tank, FSDS and WSDS systems.

JOINT NUCLEAR, BIOLOGICAL and CHEMICAL DEFENCE (JNBCD) is a Canadian Forces deployable nuclear, biological and chemical defence response team. JNBCD use SEI products such as its vehicle decontamination system.

ALERT is a Canadian Forces Base that uses SEI fuel systems to store diesel and jet fuel. It is the most northerly

CF MISSIONS IN EUROPE

SEI supported numerous overseas missions with bladder tank farms, fuel/water distribution systems and custom equipment.

Operation QUADRANT – Canadian Forces mission in Kosovo uses SEI equipment.

Operation FORAGE – Canadian Forces contribute to NATO's Essential Harvest in Kosovo using SEI equipment.

Operation Echo – Canadian Forces in Aviano, Italy, enforce a no-fly zone over the Balkan region using SEI equipment.

Operation KINETIC – Canadian Forces contribute to the KFOR NATO peacekeeping mission in Kosovo using SEI equipment.

Operation PALLADIUM – Canadian Forces contribute to the NATO stabilization force in the Balkans using SEI equipment.

Operation CAVALIER – Canadian Forces contribute to the NATO stabilization force in the Balkans using SEI equipment.

CF MISSIONS IN MIDDLE

Operation DETERMINATION – Canadian Forces deploy to the Persian Gulf using SEI fuel bladders.

Operation ACE GUARD – CF participates in the (NATO) Allied Command Europe Mobile Force in Turkey using SEI Onion tanks.

Operation RECORD – Canadian Forces mission to secure Iraqi-Kuwaiti border saw the use of an SEI aviation refueling system.

Operation APOLLO – Canadian Forces contribute to the international campaign against terrorism using SEI fuel bladders and FARE (forward area refueling equipment).

Operation ATHENA – SEI assisted the CF contribution to the NATO stabilization forces in Kabul, Afghanistan with various products.

Operation ARCHER – Canadian Forces lead NATO stabilization forces in Kandahar, Afghanistan. SEI supports this effort with fuel and water systems.

CF MISSIONS IN ASIA

Operation STRUCTURE – Canadian Forces tsunami aid to Ampara, Sri Lanka, uses SEI's reverse osmosis water purification unit and Onion tanks.

Operation PLATEAU – Canadian Forces respond with humanitarian aid to the 2005 earthquake that struck South Asia. SEI equipment included the use of Onion water tanks.

CF MISSIONS IN AFRICA

Operation DELIVERANCE – Canadian Forces mission to Somalia uses SEI fuel bladders.

Operation ECLIPSE – Canadian Forces contribute to the UN mission in Ethiopia and Eritrea using multiple SEI bladder tanks along with FSDS/WSDS systems.

Operation ADDITION – Canadian Forces contribute to the UN mission in Ethiopia and Eritrea using multiple SEI bladder tanks along with FSDS/WSDS systems.

Operation CARAVAN – Canadian Forces contribute to the French-led interim emergency multi-national force in Bunia, Democratic Republic of Congo. SEI supports with light aircraft refueling systems.

CF MISSIONS IN THE

Operation CONSTABLE – SEI supported a Canadian Forces United Nations mission during the fall of Haiti's government in 1997.

Operation HESTIA – After Haiti's devastating earthquake in 2010, Canada's prime minister was photographed drinking from

MILITARY OPERATIONS

THE HISTORY OF SEI COMBAT SUPPORT

For more than 20 years, we've supported the military.

SEI Industries Ltd. has been supporting military forces around the world with rapidly deployable fuel and water options (storage, transferring, transportation and pumping systems) for more than 20 years. SEI also manufactures a wide selection of military specification products for both NATO and non-NATO countries.

Over the past two decades, SEI has gained a depth of experience engineering and manufacturing custom mission support solutions for combat and special forces as well as humanitarian, peacekeeping and policing missions. Some custom solutions include ablution liquid storage, sewage treatment ponds, water monitoring equipment, micro forward area refueling equipment (FARE) and platform specific range extension or fuel delivery solutions for Zodiac boats to C-130 transports.

In addition to our experience and commitment, all SEI military clients can also depend on dedicated supply life cycle management (LCM) and field support representatives (FSRs).

SEI's fuel/water distribution systems are used around the world.

SEI has dedicated NATO Stock Numbers (NSNs) for many of its individual products and turnkey fuel/water systems including the Fuel Storage and Distribution System (FSDS), Water Storage and Distribution System (WSDS), High Pressure Aviation Refueling System (HPARS) and the new FS34DS (a fuel distribution system for rapid deployment). SEI also specializes in modular systems that can be expanded depending on mission requirements.

If it's liquid storage, transport, transferring, filtering or metering, militaries can depend on SEI to meet their mission requirements.
