

DRIP DEFENDER™

SPILL COLLECTION PAD FOR VEHICLES

The Drip Defender is a rugged, easy-to-use, all-purpose spill collection pad designed to catch leaks. Ideal for use under all types of vehicles, industrial machinery or any other potential sources for leaks, the Drip Defender is able to withstand all climates and conditions.

DESIGN FEATURES

- Constructed of durable, rugged Chem-Shield™ material which is suitable to -34 degrees Celsius (-30 degrees Fahrenheit) and is resistant to fuels, oils and most chemicals including acids. If ordered with Arctic-Shield material, then fully-certified by Intertek to meet the CAN/ULC-S668-12 standard.
- Drip Defender includes a window style pocket designed to hold a standard 19" x 17" (48 cm x 43 cm) absorbent pad.
- A grommet in one corner with an optional string attached allows for easy retrieval from under vehicles.
- Drip Defender can be folded or rolled up easily for storage.

EDGE FEATURES

- Chain supported – the weighted edge allows for outdoor use and enables excess liquid containment after the absorbent pad is saturated.

CUSTOM MODELS

- Custom sizes are available in each edge style.
- Custom window sizes are available for various sizes of absorbent pads.
- Multiple window configurations are available to extend the protection area.
- Windowless versions are also available.
