

HELITANK™

HELICOPTER SLUNG TANK FOR WATER SUPPLIES

Helitanks are purpose-built for use on flat terrain or minimal slopes. Specifically designed for Type 2 helicopters, the Helitank can deliver critical water resources for exhausted fire crews in hard-to-reach spots.

Capable of providing a steady supply of fresh drinking water or simply a supply of standard water for mop-up operations, the Helitank has proven itself as a trusted water supply tool. Available in two sizes and two models; standard or potable (drinking) water.

FEATURES

- Constructed of durable and rugged fabric that is mold and mildew resistant
- Harness is constructed of heavy duty tie-down webbing for strong and secure transport
- Comes with a 4" (102 mm) filler cap and a 1.5" (380 mm) discharge hose with ball valve shut-off
- Compact to store
- Easy to clean and repair
