

# MILITARY PRODUCTS

SERVING THE CANADIAN FORCES AND MORE THAN 50 OTHER MILITARY FORCES

**F34DS:** The 3,170 USG F34DS is a portable gas station that can be transported to site, by land, sea or air, for rapid deployment.

APPLICATIONS: Military bulk fuel distribution. NSN: 4930-20-005-8899

**FSDS:** SEI's 95,000 USG Fuel Storage Distribution System (FSDS) is engineered for quick set-up and operation without a support power supply.

APPLICATIONS: Military bulk fuel distribution. NSN: 4930-21-910-0723

**HPARS:** The 200 USGPM High Pressure Aircraft Refueling System (HPARS) is designed to provide flexible support for aerial operations.

APPLICATIONS: Military aircraft and tanker truck refueling. NSN: 4320-20-002-4760

**ONION TANK:** With capacities ranging from 264-3,000 USG, the Onion Tank is used to store drinking water in remote locations and during emergency situations.

APPLICATIONS: Potable (drinking) water storage. NSN: 5430-21-910-0778

**BATT:** The Bulk Aviation Transport Tank (BATT) is customized to fit inside specific airframes to allow the transportation of bulk fuel by aircraft.

APPLICATIONS: Military fuel transportation.

**FUEL-EASY:** The lightweight Fuel-Easy is a collapsible, flyable fuel container (180-1,260 USG) made especially for helicopters to replace the use of fuel drums.

APPLICATIONS: Military fuel transportation.

# SEI MILITARY PRODUCTS (CONTINUED)

**FUEL BLADDERS:** Designed for specific climates, SEI's 500-30,000 USG Arctic King, Desert King and Jungle King bladder tanks offer proprietary technology to withstand extreme environments.

APPLICATIONS: Fuel storage to support combat and disaster relief operations.  
NSN: 4930-20-006-2081

**INSTA-BERM:** Insta-Berms provide secondary containment around bladder tanks, fuel drums and other fuel storage options to prevent the escape of hazardous fluids into the environment.

APPLICATIONS: Secondary containment around fuel storage products. NSN: 4930-20-001-7843

**RIDE-SIDE BERM:** The Ride-Side berm is a specially designed berm with collapsible walls that allows vehicles to enter and exit without manual assistance.

APPLICATIONS: Military vehicle decontamination.

**HAZMAT TANK:** Designed to meet the most rigorous demands, the 600-6,000 USG Hazmat Tank assists with spill response and provides containment for hazardous materials.

APPLICATIONS: Hazardous materials containment.

**BAMBI BUCKET:** Slung underneath a helicopter during firefighting activities, the world famous Bambi Bucket is designed to deliver a precise column of water to the target (72-2,600 USG capacities).

APPLICATIONS: Military firefighting. NSN: Various

**GREEN DRAGON:** The Green Dragon is an automated fire ignition device that can be successfully mounted on several ground-based platforms including trucks, boats, ATVs and UTVs.

APPLICATIONS: Controlled burns for firing ranges or areas with unexploded ordinance.
