

PUMPKIN TANK™

OPEN TOP WATER RESERVOIR FOR
WILDLAND/URBAN INTERFACE FIREFIGHTING

This rugged, lightweight, multi-purpose tank shines in every arena. Whether it's used for ground fire-fighting, for aerial operations or as a reservoir/relay tank, the self-supporting Pumpkin Tank gets the job done. Built with knowledge of what works in the field, the water in this tank is deep for full Bambi Bucket dips every time. When access to natural water supply is limited, the Pumpkin Tank can step in – whatever the application.

FEATURES

- Extra large, open top for easy helicopter bucket filling
- Unique flotation collar design, no inflation required
- Self-supporting with foam collar that resists any 'sinking'
- Compact and simple to use, no frame or parts to assemble
- Rugged industrial fabric that is mold and mildew resistant
- Multi-point tie down system for protection from rotor wash
- Easy discharge through a standard 3" NPT outlet
- Models/sizes available to suit all helicopter buckets
- Portable, compact size can be used in remote areas
- Frameless construction provides minimal time for setup by one or two people
- Flotation collar hugs the water surface ensuring no overflow

GROUND APPLICATION

In ground operations, firefighters can use the Pumpkin Tank as an emergency water reservoir or as a readily available water source during prescribed burning. The self-supporting Pumpkin Tank may be easily filled from the nearest water source and, in remote areas, the Pumpkin Tank can be filled by pumping water from natural sources such as streams and lakes or via helicopters using Bambi Buckets.

AERIAL APPLICATION

When access to water supply is otherwise limited, pilots, who are heli-bucketing, can quickly fill their buckets from a Pumpkin Tank and proceed to the fire site. The Pumpkin Tank can be replenished with water while the pilot ferries between the water source and the fire site, thereby maximizing valuable helicopter time.

OTHER APPLICATIONS

- Water relay tank
- Long or short term water storage
- Protection of urban interface exposures

Please note: If used exclusively for mixing foam and/or retardants, use the Fireflex Hazmat tank.

PUMPKIN TANK

OPTIONS

- Ball valves/fittings
- Ground pads
- Transport bags
- Repair kits
- Secondary internal impact pads available for large size tanks
- Drainage outlets: 1" to 6" NPT

PUMPKIN TANK SIZES FOR BAMBI BUCKET

The Pumpkin Tank can be used as a dip tank for helicopters equipped with the aerial firefighting Bambi Bucket. The following chart shows the recommended tank sizes for different models of the Bambi Bucket.

BAMBI BUCKET MODEL #	EMPTY BUCKET HEIGHT		RECOMMENDED PUMPKIN TANK		
			TANK MODEL #	FULL HEIGHT	
	IN	CM			IN
BB2024	39	99	FFTF2530	48	122
BB2732	43	109	FFTF4048	60	152
BB3542	52	132	FFTF5060	68	173
BB4453	52	132	FFTF5060	68	173
