

STILWELL FLYER™

HELICOPTER TRANSPORTABLE WATER CELL
A.K.A. BLIVET

Effective on remote, steep, sloped terrain, the Stilwell Flyer is a portable water container that is transportable by helicopter with long line delivery.

Constructed of durable, rugged, flexible fabric that is mold and mildew resistant, the innovative tetrahedron shape of the Stilwell eliminates twisting and residual bounce in flight.

FEATURES

- Constructed of durable, rugged, flexible fabric that is mold and mildew resistant
- Includes one each fill and drain ports for quick filling and discharge
- Compact for quick storage, easy to clean and repair
- Fabric available for potable water use (drinking water) or standard water use (not for human consumption)
- Comes with 4" (98 mm) filler cap and 3/4" (19 mm) discharge hose with ball valve shut off
- Inexpensive, durable and safe for transport by helicopter
