

TRACK TRAY™

SECONDARY CONTAINMENT RAIL BERM

The Track Tray has been designed to catch minor spills from rail cars during liquid or dry bulk loading and off-loading. Deployed in only three minutes, the Track Tray provides a quick and easy solution to secondary rail containment.

The low profile of the Track Tray allows placement without contacting wheel flanges. Its modular design allows multiple Track Trays to be connected to extend overall protection length. Meets EPA regulation 40CFR112.7

DESIGN FEATURES

- Constructed of durable Chem-Shield™ material.
- Capacity: 75 USG (286 liters).
- Deployed dimensions: 100" long x 57.5" wide x 3" high (254 cm x 146 cm x 7.6 cm)
- Collapsible and can easily be rolled for compact storage.

BERM OPTIONS

- Bottom drain: ¾" (1.9 cm) GHT
- Bulkhead drain: 1½" (3.8 cm) or 2" (5.08 cm)

The overlap of two Track Trays.
