

Bambi Bucket Sacksafoam Bladder Bucket Mounted Foam System

The Sacksafoam™ Bladder is a foam injection system designed for the transfer and dispensing of aerial righting foam, specifically designed to work in conjunction with the Bambi Bucket.

FEATURES

- Fast and easy installation with prewired connectors
- The touch-screen Sacksafoam Controller delivers an accurate percentage of foam concentrate.
- The sack containing the foam concentrate mounts in the Bambi bucket.
- An internal check valve stops water from owing into the sack and insures that foam is dispensed only while the injection pump is operating.

Bambi Bucket Sacksafoam Bladder Bucket Mounted Foam System

The Bambi Bucket is used in more than 110 countries around the world by more than 1,000 helicopter operators.
